

Workshop

3 of July 2014
Instituto Superior de Agronomia
Lisbon – Portugal

Program

3rd of July 2014 - 14h30-18h30: Keynotes on manure management in EU and overview of research lines of ReUseWaste projects

Confirmed speakers:

- Overview of the ReUseWaste project – Lars Jensen (DK)
- Fertilizing value of Manure – Henrique Trindade (PT)
- Field application and gas emission of slurry treated by additives and mechanical separation - Maxwell Owusu-Twum (PT)
- Nutrients fluxes and manure management – Carlo Grignani (IT)
- Crop nutrient value and GHGs emissions from biochar based biofertilizers - Raghunath Subedi (IT)
- Potential for on-farm fluidised bed combustion of poultry litter for energy and recycling of nutrient - JJ Leahy (IR)
- Effect of Slurry Acidification on Particle Size Distribution and Separation Efficiency - Iria Regueiro (PT)
- Hou, Yong: Nitrogen and greenhouse gas emissions in the manure management chain: a review
